DETAILED ACTION

Specification

1. A substitute specification including the claims is required pursuant to 37 CFR 1.125(a) because the top and bottom margins are not the proper size. The specification as entered has hole punches through the text at the upper and lower portions of the pages.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 2, 3, 16 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3752

In claims 2 and 3, line 3, "a circular exit opening" raises double inclusion issues since the limitation has already been positively recited in claim 1. The phrase should be changed to --said circular opening--.

In claim 16, lines 2 and 3, "a circular exit opening having an opening" raises double inclusion issues since such a limitation has already been recited in claim 6. Also, "an opening" raises double inclusion issues since this appears to be the same limitation as the "circular exit opening".

In claim 19, lines 2 and 3, "a circular entrance" raises double inclusion issues since such a limitation has already been introduced in claim 17.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 6, 10, 12, 14 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Kasinskas.

Kasinskas shows a nozzle comprising a flared opening 114a'/114a", a cylindrically-shaped barrel 114a, a cone-shaped wall114e, a small-diameter exit tubel14c/114d.

As to "for delivering a measured quantity of viscous liquid", statements of intended use carry no patentable weight.

Allowable Subject Matter

- 6. Claims 1, 4 and 5 are allowed.
- 7. Claims 7, 8, 9, 11, 13, 15 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 8. Claims 16 and 19 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
- 9. Claims 2 and 3 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Goodwin et al, Massey et al, Hawley and Hubner et al show various types of nozzles with cylindrical/cone-shapes.
